

## **ConsenSys Shares 2.0 Update**

NEW YORK, NY / December 6, 2018 -- We are ushering in a new chapter in the development of our organization, ConsenSys 2.0. This is guided by our commitment to position ourselves strategically for our next period of growth, as the blockchain ecosystem matures. Excited as we are about ConsenSys 2.0, our first step in this direction has been a difficult one: we are streamlining several parts of the business including ConsenSys Solutions, spokes, and hub services, leading to a 13% reduction of mesh members. Projects will continue to be evaluated with rigor, as the cornerstone of ConsenSys 2.0 is technical excellence, coupled with innovative blockchain business models.

ConsenSys is dedicated as ever to our mission of supporting and growing the Ethereum community and #BUIDLing the decentralized future together. Thank you to our friends and collaborators for continuing with us on this important journey. It's only just beginning.
